- Sturdy molded-in handles

Certifications

Made in America

NSF Listed

Technical Data

Features	Made in America NSF Listed
Insulation Material	Polyurethane
Lid Type	Flip-Top
Material	Polyethylene

Notes & Details

For ice on the go, the CaterGator 125 lb. capacity black mobile ice bin with flip lid is the perfect choice. It features a flip top lid design that allows for quick access and is easy to remove from its steel hinges. Removing it creates a half-open lid for continued access and open use. For thorough cleaning, the two-piece lid is completely removable by releasing the plastic side latches, providing easy access to the interior of the bin.

This ice bin delivers superior temperature retention, maintaining cold temperatures for up to 4 hours. It does this with polyurethane foam insulation, which boasts excellent temperature retention. Prior to use, the bin can be pre-chilled in a walk-in refrigerator or freezer. Just open the lid to help in the chilling process.

Great for caterers and venues, the bin is outfitted with (4) 5" non-marking casters, which won't damage floors. The swivel casters allow for easy maneuvering around tight corners; plus, one caster features a brake to keep the bin secure whenever needed. Also, the faucet drains away excess water during service to help maintain cold temperatures. The recessed design of the faucet keeps it hidden and out of the way while the transporting the unit so it doesn't accidentally hit obstacles and break off.

This CaterGator ice bin is perfect for catering events and restaurants, as well as indoor and outdoor bars to help limit multiple long trips to the kitchen for ice refills. It can also be used to keep bottled beverages chilled while merchandising or at any catering event. It will fit easily under standard 35" counters to save space at your busy venue.
