- Ensures cold foods are safely held below 41 degrees Fahrenheit
- Great for catering businesses and cold holding applications

Certifications

Notes & Details

Keep packaged foods cold during transport or service thanks to this CaterGator blue full size ice board. The perfect solution for food pan carriers, vending carts, and kiosks, this ice board is easy-to-use. Simply freeze it flat for at least 8 hours and then slide it into your CaterGator food pan carrier (sold separately), load pans of pre-chilled food, and your meal service operation is ready to go! To get the most out of your ice board, position it at the top of your food pan carrier as the cold air will sink and keep your cold foods safely below 41 degrees Fahrenheit.

Made from a strong, 1 1/2" thick PE material, this ice board is also designed to withstand frequent use. Keeping food cold inside of your insulated carrier, it helps to extend the holding time beyond 4 hours and ensures that your food items stay the perfect, chilled temperature for serving. With the added time, you have more flexibility as you transport food to and from different job sites and events. This ice board also works well with vending carts or kiosks. It can even be used underneath a full size hotel pan to keep food chilled on a buffet line. If you're looking to serve cold sandwiches, cheese, yogurt, milk, or sodas at proper temperatures, this CaterGator full size ice board is the perfect addition to your food service set up!
