Loading Style	Top Load
Material	Polyethylene
Pan Capacity	1 Pan
Power Type	Non-Electric
Product Line	CaterGator
Shape	Rectangle
Style	Single
Temperature Retention	7 Hours
Type	Food Pan Carriers

Notes & Details

Designed for transport, the CaterGator black top loading 6" deep insulated single food pan carrier with red hot board provides the versatility and quality you need to safely deliver pans of food. It holds up to (5) 2 1/2" deep food pans and can accommodate various combinations of full, fitting 1/3, 1/2, and full size food pans up to 6" deep, making this carrier a go-to choice for any application. It will work with most types of pans as well, including foil, plastic, and even stainless steel. The carrier features a top loading design for ease of loading, allowing you to simply place pans directly down into the carrier and lift them out upon delivery.

Because the carrier is made with polyurethane foam, it offers superior temperature retention and maintains hot or cold food temperatures for up to 7 hours. The carrier is also NSF certified and Made in America. As a bonus, this carrier comes equipped with a red full-size hot board that is convenient and easy to use. This board will extend the temperature holding times of your hot foods by an additional 4 hours by simply placing the board in water no hotter than 200 degrees Fahrenheit for 35-60 minutes, and slide or place into your carrier. This provides a total of up to 11 hours of perfect storage temperatures! This board lays flat in carriers and comes equipped with distance knobs that prevent the board from sticking to the pan. A built-in handle conveniently lifts the board in and out of the carrier to avoid injury.

This insulated pan carrier features a rugged, polyethylene exterior and withstands constant wear and tear from use, transport, and exposure to high heat. It includes plastic latches that securely lock the door to retain temperature. For convenient transport, the unit features molded-in handles that are both durable and ergonomic. When the carrier is set down, the base nests in the lid when it's flipped upside down; grooves in the lid securely hold the base in place. Not only does this keep the lid safe and out of the way, it simplifies unloading and service. After use, the unit stacks with other sizes, such as 4" and 8" deep CaterGator top loaders and other similar carriers from other brands. Delivering quality products at a fair price, CaterGator is the ideal serving solution for catering businesses, hotels, food trucks, and concession stands. Upgrade your catering services with this insulated food pan carrier!
