Type	Food Pan Carriers

Notes & Details

Designed for transport, the CaterGator Dash black full size 8" deep flip down top loader EPP insulated food pan carrier with 2 Vigor full size 2 1/2" deep polycarbonate food pans and secure sealing covers provides the versatility and quality you need to safely deliver food. The food pan carrier holds (1) 8" deep full size food pan to accommodate any of your signature dishes. Because the carrier is made from expanded polypropylene (EPP), it offers superior temperature retention and maintains hot or cold food temperatures for up to 4 hours.

This set includes two durable Vigor full size 2 1/2" deep polycarbonate food pans that can be used to prep, store, transport, and serve food items. The polycarbonate material is virtually unbreakable and resistant to food acids and oils, helping to extend the life of each food pan. Polycarbonate can also withstand temperatures ranging from -40 to 212 degrees Fahrenheit so that it can be used in various storage locations. Thanks to the clear material, each pan offers optimum visibility for quick product identification. A spoonable bottom makes removing contents easier, allowing your guests or employees to scoop up every ounce of food, reducing food waste. The reinforced top and bottom corners are also resistant to bending, cracking, and denting so the food pans will be ready for long-lasting use in your commercial kitchen.

To keep your food stored as hygienically as possible, this kit also includes two Vigor full size gray secure sealing polyethylene food pan covers. Made of durable polyethylene, this cover withstands repeated use in busy commercial kitchens and catering operations. It withstands temperatures from -40 to 180 degrees Fahrenheit. In addition, its unique seal offers extra protection against spills and messes. This insulated pan carrier set is excellent for transporting foods to offsite locations, making it perfect for catering businesses, food trucks, and other mobile operations.

The food pan carrier offers professional grade construction made from expanded polypropylene (EPP). This closed-cell bead foam provides thermal insulation with a high level of durability to weight ratio, plus it's an excellent energy absorbing material that withstands multiple impacts without damage. It also offers excellent impact, water, and chemical resistance. This carrier has a clever fold-down design that allows you to break it down to the size of a typical insulated food delivery bag, maximizing your limited space when not in use and helping you save on shipping costs! Not only a durable and lightweight option, this carrier is an eco-friendly choice for your business. It's also stackable, allowing for effortless transport in cars or vans. For added convenience the molded handles on either side of the carrier provide an ergonomic grip for comfort while transporting. This carrier features two half-sized hinged doors that easily swing open to a full 270 degrees to grant unobstructed access to the carrier's contents.

Delivering quality products at a fair price, CaterGator is the ideal serving solution for catering businesses, hotels, food trucks, and concession stands. Upgrade your catering services with this insulated food pan carrier!

Kit Includes:

- (1) 8" Flip down top loading insulated food pan carrier
