

HEAVY DUTY THIN TIP THERMOMETER

The CDN Heavy Duty Thin Tip Thermometer (Q2-450X) is now improved to address the foodservice industry needs of today.

The thin tip of the NSF® Certified Q2-450X has always made it the go-to thermometer for thin cuts of meat. The tip is now even smaller, measuring only 1.5 mm, which is excellent for even thinner cuts of delicate fish, compressed hamburger patties, or bite-sized fare.

With an ever-growing concern about bacterial cross contamination, CDN has answered the call with the addition of BioCote® antimicrobial coating to its ProAccurate® line, including this thermometer.

Offering the advantage of easy field recalibration, this digital pocket thermometer has become the industry's standard. The CDN Heavy Duty Thin Tip Thermometer provides all the features commercial kitchens require.

FEATURES

- NSF® Certified
- 6 second response
- 1.5 mm thin tip
- Waterproof
- Data-hold locks reading
