

# StayFlat® Sheet Pans

*StayFlat® Sheet Pans have sidewalls that are continuously reinforced with an engineered rib that increases its sidewall strength up to 30%. This feature coupled with a concave bottom and residual tensile stress results in a pan that resists bowing and stays flat longer!*

## Reinforced Sides Prevent Flaring

StayFlat Sheet Pans feature sidewalls that are continuously reinforced with a horizontal engineered rib. This feature increases sidewall strength up to 30% and provides an easy visual identification reference for situations where stronger, flatter sheet pans are required, such as for transport or for baking pies and cakes.

## Increased Tensile Strength

A proprietary manufacturing method imparts a residual tensile stress in the StayFlat pan bottom, which further increases the strength of the pan and resists damage from denting or bowing.

Continuously reinforced sidewalls

## Concave Bottom Resists Bowing

The method used to increase tensile strength of the StayFlat pan bottom also creates a slightly concave bottom that flattens during heating for even heat distribution and increased resistance to bowing.

## BUNDY BAKING SOLUTIONS:

-  Baking Pans
-  Release Agents
-  Pan Coatings & Refurbishment
-  Equipment & Services

## Ultimate Coatings

### AMERICOAT® ePlus Silicone Glaze

- Longer-lasting performance
- Reduced pan oil and labor costs
- Increased durability
- Reduced food staining

### DuraShield® Non-Stick Coating

- Virtually eliminates the use of oils
- Outstanding release characteristics
- Certified to be PFOA-free
- Easy to clean and dishwasher safe

## Pan Glo® Recoating Services

With Pan Glo locations across North America, your pans can be cleaned and reglazed with AMERICOAT® ePlus and returned to your operation with like-new release characteristics.
