Number of Decks	Single
Number of Doors	2 Doors
Number of Racks	3 Racks
Oven Interior Style	Standard Depth
Plug Type	NEMA 5-15P
Power Type	Liquid Propane
Size	Full Size
Temperature Range	150 - 500 Degrees F
Total BTU	50000 BTU

Notes & Details

This Cooking Performance Group single deck standard depth full size liquid propane convection oven is an invaluable asset to any commercial kitchen. Perfect for virtually all cooking and baking applications, this oven provides the versatility your business needs. From a hearty lasagna to a delicate souffle, the oven can handle a wide menu of items to keep up with customer demands. Its dual-speed fan, adjustable racks, and generous temperature range all make it a must-have in professional food service.

Powered by 50,000 total BTU, the unit reaches temperatures from 150 to 500 degrees Fahrenheit. It operates with an electric automatic thermostat for reliable precision, making this oven great for countless menus and food service operations. This oven also has a digital control display. For safety, it features an automatic ignition system that activates in the event of a flameout. Plus, if ignition fails 3 times, the unit will automatically shut down.

For long-lasting durability and easy cleaning, the exterior and interior are constructed of sturdy stainless steel with a porcelain interior floor. This unit offers a built-in timer and a full size cavity that houses 3 adjustable wire racks. These racks rest on the 11 sets of slides along the interior side walls, so you can benefit from a variety of rack configurations to best accommodate your trays or full size food pans.

This unit allows you to switch the built-in convection fan between 2 modes, cool and cook, and 2 speeds, high and low. This gives you control over the oven's operation so it works best for your tried-and-true or experimental recipes. Additionally, the 2 independent glass doors provide excellent visibility while closed, allowing you to check on dishes without releasing hot air and reducing the chamber temperature. The doors feature Bakelite handles that provide comfortable heat resistance. This oven requires liquid propane and a 120V electrical connection for operation.
