### Notes & Details

Experience top-of-the-line pizza cooking performance with the Cooking Performance Group electric ventless high-speed impingement oven! This innovative oven features a combination of impinged air, convection, and infrared technologies that deliver faster cooking times, ensuring that your pizzas are made to perfection in record time. Its certified ventless design eliminates the need for a commercial hood, providing you with versatile installation options that cater to your unique kitchen layout. With a sleek stainless steel construction and compact footprint, this oven is not only built for heavy-duty use but is also visually appealing, making it suitable for front-of-house use in restaurants, pizzerias, bakeries, and cafes!

Equipped with a programmable touchscreen for custom recipes, this high-speed impingement oven offers convenience and ease of use for busy commercial kitchens. It can store up to 1,024 different recipes with up to 8 steps each, divided into 16 groups, ensuring maximum efficiency in your kitchen. This programmability also helps with labor savings, as the simple controls make it easier to train new employees! Plus, since this unit has USB compatibility, recipes and settings can be transferred via USB drive for quick and easy programming across multiple units. This unit includes an aluminum paddle, a 16" round pizza screen, a cleaning paddle, and (4) 4" removable bullet feet to help you get started right away.

This oven boasts exceptional cooking capabilities, featuring an adjustable temperature range from 86 to 626 degrees Fahrenheit to accommodate a variety of recipes. With its insulated design, double glass door, and chamber illumination, this impingement oven provides exceptional heat retention and visibility while baking. Its stackable design allows you to stack it with one additional unit to save valuable counter space, while its interior can accommodate up to 16" pizzas, making it ideal for busy pizzerias. It also has a removable catalytic converter for convenient cleaning. Experience the cutting-edge technology and superior performance of this Cooking Performance Group electric impingement oven today! This unit requires a 208V or 240V electrical connection for operation.
