Corner Guards - Aluminum

Our Aluminum Corner Guards are designed to protect wall corners and edges from damage which reduces costs and time needed for maintenance and repair. This is especially important in high-traffic facilities, hallways, corridors, back of the house operations, delivery areas and other work zones. New Age Corner Guards are a less expensive alternative to stainless steel options.

Our Aluminum Corner Guards are simple to install by applying a heavy duty adhesive or utilizing mechanical fasteners that drill and screw into the wall. For the best results, begin by aligning the Corner Guard on a wall corner from bottom to top, working upward.

- Constructed of .080" thick aluminum sheet.
- Lifetime Guarantee against rust and corrosion
- Five-Year Guarantee against workmanship and material defects.
