

PRO HEPA 4520P is a “pump-out” vacuum for fast, high volume pick-up of spills, flood water and concrete slurries. Equipped with a 40 GPM discharge pump mounted inside a 20 gallon tank, the 4520P can empty itself continuously without stopping the vacuuming process. A powerful 2 horsepower motor provides the air-flow and suction to meet the tough requirements of any professional contractor. Don’t be misled by its size, this high capacity wet vacuum is extremely portable and easy to transport from job to job.

Features

- ✓ 2 HP commercial grade, 2-stage bypass motor
- ✓ Immersible pump provides continuous discharge up to 100 feet away
- ✓ Mesh bag inlet screen captures large particles preventing interruptions of flow. Bag can be emptied and replaced in seconds
- ✓ Reliable wet shut-off system to prevent liquids from reaching the motor.
- ✓ Rotational molded polyethylene tank with built-in handle, large rear wheels and front swivel casters. Tank will not dent, puncture or lose airseal. Easy to transport even when going up and down stairs with full tank of liquids.
