

74" THERMOPLASTIC DIAMOND PARK BENCH

Infusing public spaces with timeless character, the 74" Thermoplastic Diamond Park Bench represents a seamless fusion of classic aesthetics and industrial-grade weather resistance. Engineered specifically for high-traffic environments, this bench features a classic diamond pattern pressing, reinforced with a 5/8" x 1-1/2" high-strength steel flat bar core, and fully encapsulated in a thick, durable thermoplastic coating.

Unlike conventional powder-coated finishes, our thermoplastic layer is thicker and more rugged, offering superior protection against UV rays, rain, moisture, and extreme temperature fluctuations. Spanning over six feet in length, it provides ample seating capacity while preserving its charming, heritage-inspired appearance that complements any landscape. Whether anchoring a bustling downtown or providing a quiet resting spot in a serene garden, this bench is built to retain its vibrant, signature look for decades to come.

FEATURES:

- > > All-Weather Resistant - Thick thermoplastic coating resists UV rays, rain, snow, and extreme temperatures without cracking or fading.
- > Classic Design - Timeless diamond pattern complements any landscape, from parks to plazas.
- > Rust-Proof & Low Maintenance - Thermoplastic coating prevents corrosion and cleans easily with minimal upkeep.
- > Heavy-Duty Load Capacity - Reinforced with 5/8" x 1-1/2" steel flat bars, the bench supports a safe working load of up to 2,100 lbs.
- > Versatile Use - Ideal for gardens, decks, sidewalks, schools, and commercial spaces.
