

The Big Dipper® DSA-25-1 Dry Strainer is a companion for Big Dipper units up to 25 gpm to simplify maintenance and reduce clogged drains due to coarse solids buildup. The Dry Strainer separates & collects coarse solids such as rice, coleslaw and other food scraps larger than 0.065" (1.59 mm) in diameter. The removable tray allows for easy and sanitary disposal of the collected coarse solids directly into a trash receptacle. The Dry Strainer is constructed of durable plastic and offers a simple solution for solids waste disposal.

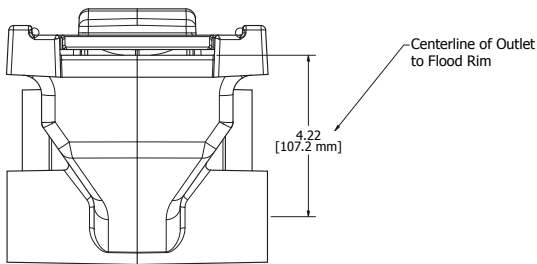

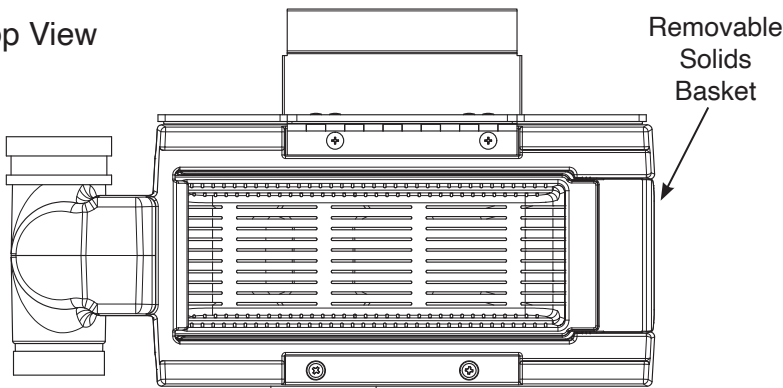

PRODUCT FEATURES

- Constructed of corrosion resistant plastics suitable for installation in virtually any location.
- Designed to connect to the Inlet of all Big Dipper units up to 25 gpm.
- Field reversible for easy installation.
