Technical Data

Color	Silver
Features	Hot Water Faucet NSF Listed
Number of Groups	3 Groups
Number of Steam Wands	1 Wands
Plug Type	Hardwire
Style	Automatic
Type	Espresso Machines Tea Brewers
Water Inlet Size	3/8 Inches
Water Source	Direct Connection

Notes & Details

Make and serve a wide variety of drinks with this Estella Caffè three group teapresso machine. This machine is perfect for serving drinks from coffee to tea depending on the chosen portafilter for unlimited combinations of drink options. It features 2 tea portafilters, 1 single coffee portafilter, and 1 double coffee portafilter as well as 3 group heads. Each group head has 4 programmable settings that allow the customer to set the amount of tea or coffee dispensed as well as the temperature, ensuring every brew is consistent. It comes with a steam wand, a hot water outlet, and 1.5 gallon and 3.17 gallon broilers.

This unit eliminates the need for extra equipment such as tea barrels and hot water dispensers, taking up less room in your busy kitchen. Additionally, it features a 90-second extraction to get the best flavor and aroma from your tea drinks. To ensure every drink is fresh and ready to consume, this machine allows the tea to be brewed per order by the cup.

This teapresso machine combines a minimal design with its metallic texture and diamond black side panels. Plus, its independent auto-cleaning function makes cleaning and maintaining this unit easy. Thanks to its multi-boiler preheating and heat system, this machine ensures water flow endurance and temperature stability, and it's patented to combine teapresso and espresso in one machine to bring variety to your menu. This machine's multiple temperature control allows for precise temperature monitoring while brewing your drinks. It works with the multi-infusion function to extract tea and coffee with varying degrees of concentration. This unit has a 29-43 PSI and a 3/8" male NPT fitting, and it requires a 220/240V electrical connection for operation.
