Notes & Details

Save time and labor in your bakery or pizzeria by adding this Estella 67" reversible countertop dough sheeter to your preparation area. Designed to quickly roll out several pounds of dough per minute, this sheeter features a 17 3/4" roller and can produce dough thickness between 1/32" and 13/8". The roller is equipped to roll up to 9 lb. of dough at a time, perfect for high-volume operations. It utilizes a 17" wide conveyor to move dough through the machine, and the conveyor is reversible for quick rolling from either side of the unit to accommodate the flow of your operation.

This model is made of durable, corrosion-resistant stainless steel to withstand the rigors of commercial environments while remaining easy to clean at the end of the day. The supports on either end of the machine fold up for space-saving storage, and the entire unit is designed to sit on the countertop for a reduced footprint in the kitchen. It also has several safety features to prevent worker injuries or damage to the motor, including safety guards and an emergency stop switch. A 110V electrical connection is required for operation.
