## Notes & Details

Improve the taste and quality of your food with the help of this Fryclone 10" cone oil filter bag holder with filter bag. Designed for use with 10" cone filters, this item allows you to effectively filter fryer oil in a safe and efficient manner. The included cone-shaped filter bag easily attaches to and detaches from the holder with a series of snaps, so you can get set up and start filtering within seconds. To use, simply attach the bag to the frame and hold it over a pot to drain or pour through. It's an excellent way to remove impurities from your oil, improving its freshness and extending its shelf life to minimize refills.

Regularly filtering your fryer oil will help prolong the oil's life by removing contaminants that can cause off-tastes and oxidation. You'll save money since you won't have to replace the oil as frequently and will also deliver better-tasting fried foods for your customers. This filter cone sports a 10" diameter with an easy-to-use design. Both the filter's material and the holder's sturdy chrome-plated steel construction are sure to withstand the wear and tear of everyday use, and it rinses easily with hot water.

The holder features two handles that provide a firm grip when filtering your fryer oil. Additionally, the handles offer hooked ends that can be easily attached to bowls or pots for hands-free use. With this filter holder kit, your fryer oil is sure to last longer and taste great!
