Depth	12 1/2 Inches
Height	4 1/2 Inches
Patty Diameter	5 Inches
Installation Type	Countertop
Material	Aluminum
Style	Manual
Type	Hamburger Presses

Notes & Details

Making burgers will become a breeze with the Garde HP1416 high-output 1/4 lb. and 1/6 lb. hamburger patty molding press! With just a press of a lever, you will be able to create pristinely shaped and uniform patties. In a fast-paced kitchen, weighing and sculpting each patty by hand expends lots of time and money, which is crucial in the food industry. With this press, you can ensure that each patty is 5" in diameter and either 1/4 lb., or 1/6 lb. of meat. Whether you specialize in burgers, or own your own diner or cafe, you'll find yourself using this portion control tool all day!

To provide versatility in your kitchen, this press includes 2 different molds, one designed for 1/4 lb. and the other designed for 1/6 lb. of meat. Because they're color-coded silver and green, respectively, the molds can easily be distinguished so that you can immediately see which mold accommodates what amount of meat or other patty ingredients.

The die-cast aluminum body offers a durable, heavy-duty construction, designed for high-volume use. With the simple, single-level press handle, operation is easy and super quick. Thanks to its high-output design, the handle can be used to flip the burger out of the press once released, meaning that you don't have to slide off the patty; the press does it for you! The unit's compact, ergonomic design makes this ideal for storage and saving essential counter space, and even comes with 6 plastic liners to get you started creating burgers and patties with a consistent, gourmet appearance!
