Type	Wedge

Notes & Details

Increase efficiency and keep production moving at your bar, restaurant, catering kitchen, or institution with the Garde WEDGE10 fruit/vegetable wedge cutter! This dependable, rugged wedger allows you to cut lemons, limes, and oranges for a drink garnish. You could even use this wedger to cut up cucumbers, pickles, and tomatoes for a fresh, hearty salad! With a 10 section blade, this wedger consistently creates uniform slices for your facility. When your employees arrive in the morning, they can quickly cut dozens of products at a time and store them away for later. Then, when the lunch rush hits your establishment, you'll be prepared for high-demand orders and won't be wasting valuable time wedging up fruits and vegetables by hand.

Featuring razor-sharp stainless steel blades, this wedger cuts cleanly and precisely in one swift, fluid motion. Simply press down on the push block and watch as your product is smoothly transformed into 10 sections. Thanks to the user-friendly design, even your newest employee will have no trouble operating it. And, because the stainless steel is resistant to corrosion, you'll never have to worry about blade contact with tomato juice and other acidic substances. The sturdy cast aluminum construction holds up to the wear and tear of tough, daily use, while also providing years of reliable service. To ensure stability on your countertop, the four rubber feet keep the unit from sliding during operation. For easy maintenance, the blade assembly and push block come apart quickly when it's time for cleaning.
