Type	Cutters / Slicers

Notes & Details

This Garde XL adjustable fruit / vegetable rotary slicer kit includes a portable mounting base that makes it the perfect tool to quickly and easily slice a variety of fruits and vegetables. The slicer features a heavy-duty spring system that pushes the food through the blades automatically, making slicing faster and easier than manually slicing. An extra large 9 1/2" long trough accommodates more produce than standard slicers, making it great for high-volume applications. It features a 1/8" to 1/2" adjustable thickness that can be changed without having to disassemble the slicer.

The slicer also features a heavy-duty, corrosion-resistant cast aluminum body to withstand the daily rigors of commercial environments, and the sturdy base ensures reliable usage. It has a 6 1/2" clearance, allotting enough room for a 6" food pan to be placed beneath the slicer to catch sliced produce. Its durable, razor-sharp blades create clean and consistent cuts while withstanding daily use in your establishment. Plus, the unit is easy to clean with soap and water or a mild detergent.

The included mounting base allows you to transform your stationary rotary slicer into a portable unit. This base easily secures to any smooth, flat work surface using non-slip suction cup feet. This base can also serve as a food prep or cutting surface. With the help of this portable mounting base, your slicer will become one of the most important tools in your kitchen!
