Notes & Details

Increase efficiency at your sub shop, salad bar, or commercial kitchen with the Garde XL TSXL14 1/4" serrated blade tomato slicer! Thanks to the serrated, razor sharp stainless steel blade assembly, this powerhouse machine consistently creates 1/4" slices of fresh, juicy tomatoes in a fraction of the time that hand-slicing requires. The serrated blade also ensures clean cuts no matter how firm or soft your tomatoes are, providing year round uniform slicing. You can even use this slicer to cut strawberries for pies, fruit salads, and snacks!

To change the size of your slicer, you can simply purchase the accompanying push block and blades and slice tomatoes in a different size. When you purchase this tomato slicer, not only are you investing in a valuable time-saving solution for tomato slicing, but you're also ensuring consistent, uniform tomato slices without the unsightly, pre-scored skins that otherwise appear when slicing products by hand. And, to provide you with years of dependable service, the durable cast aluminum construction resists misalignment problems, which can cause nicks, scuffs, and broken blades. For added stability, the suction cup feet ensure that the unit won't slide around during operation.
