

DISPENSE CHOICE

Growler Filler/Faucet

Fill growlers to go. Pour pints at the bar.

The new Micro Matic growler filler/faucet dual-purpose design allows the same shank fitting to either fill growlers or pour pints! No need for a dedicated growler filler. Our filler/faucet fits U.S. tower and wall shanks. It's constructed from 316 grade stainless steel. The distinctive, attractive design draws attention to "what's on tap" and enables on-premise sales of beer to go. Attach a branded tap handle to the top threads to identify the product.

Growler Filler

The Micro Matic Growler filler allows for equalizing pressure, and creating clean, complete fills with minimal oxidation. Growlers are a great way to transport keg beer home!

The growler fills a 1 liter bottle within a minute. **Simple fill process:** connect bottle, begin filling, release carbonation, complete filling and shut off beer, allow excess carbonation to escape through vent tube, remove bottle and cap bottle.

Part No. GR-F

Faucet

Turn the filler into a faucet for pouring pints by snapping in a spout. The spout is easily inserted into the growler filler opening. It takes just seconds to snap in the spout and pour a pint, and then remove the spout to fill growlers.

Part No. GR-FS

Simple fill process:

1. Connect Bottle
2. Begin Filling
3. Release Carbonation
4. Complete Filling And Shut Off Beer
5. Allow Excess Carbonation To Escape Through Vent Tube
