

Halifax EXHO748 Package Type 1
Commercial Kitchen Hood System
- 7' x 48"

Item #421EXHP748

Technical Data

Length	7 Feet
Depth	48 Inches
Height	24 Inches
Ceiling Height	10' or Over
Amps	4.9 - 9.8 Amps
Phase	1 Phase
Voltage	115/230 Volts
Wattage	1127 Watts
Features	Made in America
Fire Suppression	Optional Fire Suppression

Features

- Type 1 hood for grease-producing equipment; exhaust-only system with no makeup air
- Includes box-style hood canopy and exhaust fan
- 18-gauge 430 stainless steel construction on all exposed surfaces
- For ceilings 10' or higher
- 115/230V direct-drive exhaust fan (1750 CFM)

Certifications

Made in America

Hardwired

UL Listed, US

UL Classified EPH

Technical Data

Gauge	18 Inches
Horsepower	1/2 hp
Plug Type	Hardwire
Stainless Steel Type	Type 430
Style	Exhaust Only Hood Systems
Type	Type 1

Notes & Details

Keep your kitchen free of hazardous grease buildup with this Halifax EXHO748 package 7' x 48" type 1 commercial kitchen hood system. This unit is suitable for use over any equipment that has a surface operating temperature under 700 degrees Fahrenheit, and that is required by fire code to have a type 1 hood - this includes fryers, griddles, charbroilers, conveyor pizza ovens, or any equipment that produces grease during the cooking process. The hood removes the grease-laden vapors produced by your equipment and prevents them from accumulating in places where they could become a fire or sanitation hazard, leaving your kitchen clean and safe to use! It is an exhaust-only system with no makeup or supply fan and also contains a 115/230V direct-drive exhaust fan designed for 1750 CFM, with your choice of a wall, flat roof, or pitched roof curb mount.

The hood uses (1) 20" x 20" and (4) 20" x 16" baffle-type filters, and the filters are made from stainless steel to provide durability and make cleaning easy. Grease extracted by the filter is collected in a grease trough, which drains into a stainless steel grease cup for disposal. 18-gauge 430 stainless steel is used on all exposed surfaces to give it excellent durability and cleanability, while the MIG-welded frame provides seamless, liquid-tight joints. The hood features a box-style canopy design to provide superior performance. This model is also engineered with a 3" air gap on the back of the hood, which provides clearance and protection for combustible walls where code requires.

3 pre-wired lights illuminate the equipment under your hood so that you can easily see what you're doing while cooking, and they require a 115V electrical connection to the junction box. This hood should be used in applications where the ceiling is 10' or taller. 4 hanger brackets are included to make installation easy. It must be hard-wired, cords and plugs are not included.
