Notes & Details

Keep your kitchen free of hazardous grease buildup with this Halifax FTH0730 7' x 30" type 1 concession trailer / food truck hood. This unit is suitable for use over any equipment that has a surface operating temperature under 700 degrees Fahrenheit, and that is required by fire code to have a type 1 hood when installed in a food truck or concession trailer - this includes fryers, griddles, charbroilers, conveyor pizza ovens, or any equipment that produces grease during the cooking process. The hood removes the grease-laden vapors produced by your equipment and prevents them from accumulating in places where they could become a fire or sanitation hazard, leaving your kitchen clean and safe to use! It is an exhaust-only design with no makeup or supply fan and contains the hood only, the exhaust fan is sold separately.

The hood uses (1) 20" x 20" and (4) 20" x 16" baffle-type filters, and the filters are made from stainless steel to provide durability and make cleaning easy. Grease extracted by the filter is collected in a grease trough, which drains into a stainless steel grease cup for disposal. 18-gauge 430 stainless steel is used on all exposed surfaces to give it excellent durability and cleanability, while the MIG-welded frame provides seamless, liquid-tight joints. The hood features a sloped-front canopy design that is great for low ceilings, providing extra front clearance and comfort for chefs, and dropping down close to the equipment in the back.

3 pre-wired lights (sent loose or installed) illuminate the equipment under your hood so that you can easily see what you're doing while cooking, and they require a 115V electrical connection to the junction box. The smooth top on this hood is great for tight installations because it allows maximum clearance. 4 hanger brackets can be included at your option to make installation easy. It must be hard-wired, cords and plugs are not included.
