Notes & Details

Keep your kitchen free of hazardous grease buildup with this Halifax ODHP536 package 5' x 36" type 1 outdoor hood system. This unit is suitable for use over any grease-producing outdoor cooking equipment that has a surface operating temperature under 700 degrees Fahrenheit, and that is required by fire code to have a type 1 hood. The hood removes the grease-laden vapors produced by your equipment and prevents them from accumulating in places where they could become a fire or sanitation hazard, leaving your outdoor kitchen clean and safe to use! Perfect for all barbecue and outdoor kitchens, it combines sleek aesthetics with superior durability. It is an exhaust-only system with no makeup or supply fan and also contains a 115/230V direct-drive exhaust fan designed for 1000 CFM, with your choice of a wall, flat roof, or pitched roof curb mount. A variable dial control makes it easy to adjust the fan speed as needed to account for higher or lower ventilation needs.

The hood uses (3) 20" x 20" baffle-type filters, and the filters are made from stainless steel to provide durability and make cleaning easy. Grease extracted by the filter is collected in a grease trough, which drains into a stainless steel grease cup for disposal. 18-gauge 304 stainless steel is used on all exposed surfaces to give it the durability and corrosion resistance needed for outdoor applications, and the hood is MIG-welded to provide seamless, liquid-tight joints. The hood features a box-style canopy design to provide superior performance.

4 hanger brackets are included to make installation easy. It must be hard-wired, cords and plugs are not included.
