

# Hatsuyuki HC-8EDC Specifications

## **| HC8EDC**

12V DC Battery-operated Cube Ice Shaver

Model HC8EDC uses the food zone plastic covers and parts confirmed safe as per NSF standards. For safety, the machine does not start while the ice inlet cover is open. The stainless blade is made in Japan for its long lasting sharpness.

Recommended for outdoor use with a rechargeable deep cycle (marine) battery ; perfect for cart businesses, amusement parks, baseball/football fields, and concession trailers. A 40AH (amp/hour) deep cycle marine battery, for example, allows the HC8EDC to shave 400 or more servings of shaved ice by a single overnight charge.

The electric specifications of Model HC8EDC are DC 12V 16A 190W.

### **Specifications**
