

1000 mL Manual Dispensing System

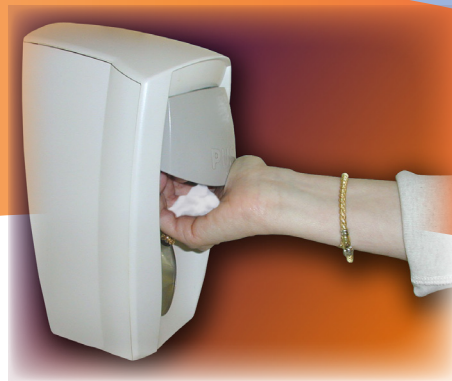

**ez HAND
HYGIENE®**
By KUTOL

9942BLK Black

9941GRA Dove Gray

Top-dispensing technology, superior results

Less waste when pushed, no leaking at the valve

The EZ Hand Hygiene upper push pad placement lets users see the amount of product being dispensed into their hand, thus reducing waste caused by over-dispensing. And, by placing the dispenser pump at the top rather than the bottom of the dispenser, the risk of leaking at the valve is eliminated.

EZ Hand Hygiene also offers these advantages:

- Fits both foam and liquid products
- Wide variety of Hand Soaps and Hand Sanitizers
- Secured keyed locking option included
- Large view window with product identification label
- No metal parts or springs, ideal for wet conditions
- ADA push compliant
- Durable ABS plastic housing
- Easy to install and maintain
- Refill labels are in English, French and Spanish
- "M-fit" No Touch dispensers available which use the same refills - install a combination of manual and automatic dispensers with less refill inventory

Keyed locking option
