

FULLY WELDED EXTREME DUTY STEAM TABLE

This maximum security steam table is equipped with a unique vandal-proof power up/power down switch.

- Power switch allows the unit to be turned on or off after the cooking controls are set and locked into their desired positions.
- No moving parts in the switch to fail, even if the switch takes a direct impact.
- Heavy-duty, 16-gauge stainless steel frame with stainless steel tops for extreme durability
- Drains have copper tube manifolds and one brass master valve for long-lasting strength
- Each well includes individual thermostats and the complete unit is wired to a master switch with indicator to monitor safe food temperatures
- Extreme Duty package includes stainless steel locking control cover for added security
- Optional channel bumper is available, mounted on a heavy gauge stainless steel frame
- 5", heavy-duty PrisonBilt™ casters, two with brakes, for smooth transportation and stability
- Tamper-resistant hardware for increased safety

Heavy-duty stainless steel for extreme durability and corrosion resistance

Each well includes individual thermostats

Easy access to service electrical components under steam table

5", heavy-duty PrisonBilt casters, two with brakes

Vandal-proof power up / power down switch
