Notes & Details

Choose an eye-catching and reliable addition to your establishment with this Lancaster Table & Seating thermo-formed medium-density fiberboard table top. This table top is crafted with a thermo-formed PVC cover. The cover is seamless, making it easy to clean and sure to stand up to long-term wear and tear. It is resistant to heat, stains, and scratching, making it perfect for use in a busy restaurant, hotel, or bar. For added convenience, this unit also features a durable black melamine backer for table bases to attach to. This table top will give your guests a comfortable place to sit while they enjoy their meal, drink, or conversation!

This Lancaster Table & Seating table top is designed with a 1" medium-density fiberboard core. This core provides a sturdy foundation and adds durability and strength to the table top. This design allows it to withstand more weight than plywood tables and prevents the table top from warping. It is made with resin and wood particle fused together. The round design and 36" size are perfect for comfortably seating 3-4 guests. This table top also sports a maple finish that complements any setting. The rounded edges look great and provide added safety for children. This table top is meant for indoor use only. It is the perfect addition to your commercial establishment.
