Notes & Details

Add a unique, rustic ambiance to your Irish pub, ski lodge cafe, or nature inspired hotel restaurant with this Lancaster Table & Seating 24" x 24" bar height butcher block table with espresso finish! Made from recycled wood, the table top is not only more environmentally friendly than models made from farmed wood, but also provides your establishment with a distinct aesthetic that can't be duplicated. The butcher block style highlights the natural beauty of the different wood species that include beech, birch, pine, ash, and oak. These beautiful woods both complement and contrast one another through natural grain pattern variance and shade. Each strip of wood accepts the dark, rich stain differently, giving a uniform appearance while simultaneously allowing each unique species to stand out.

Composed of 3/4" solid strips, the wood is affixed to 1/2" plywood for increased structural durability and stability. A 2" thick solid wood border surrounds the perimeter of the table, giving the appearance of a thicker table while maintaining a lightweight composition. It is specially designed to provide you with a dining option that will look fantastic and deliver long-lasting performance at an unbeatable price.

The pairing of the stamped steel round table base plate and table base column provides maximum stability in busy environments, allowing your guests to enjoy food and beverages on a well-balanced surface. A 13 piece floor glide and screw table base hardware kit completes the package. If you're looking for a table that spotlights the beauty of nature while also focusing on an elegant dining experience, this table is the best of both worlds!
