## Notes & Details

With this Lancaster Table & Seating 30" x 48" reversible white birch / ash laminated standard height table top and base kit, you can easily provide guests in your cafeteria, deli, or pizza parlor with a stable place to eat their meals. Thanks to the versatile, reversible top, you don't have to worry about it clashing with the color scheme or decor of your business. You can simply choose between the white birch side or the ash side for the ideal look in your establishment.

Additionally, the table top is made from durable laminate materials that are sure to stand up to long-term use in your restaurant or deli. This material makes the table top incredibly easy to clean. The brown vinyl molding on this product prevents your table from any unattractive chipping and scuffing, keeping your table looking great through general wear and tear.

Also included in this cast iron kit are two 3" table base columns, along with two 10" table base spiders, two 5" x 22" cast iron base plates, and two 10 piece floor glide and screw table base hardware packs. The base columns raise the table top and keep it steady while guests enjoy your signature drinks and dishes. They come with bolts and washers to secure the base plates and spiders for additional stability. Made of durable painted steel, these columns are built strong to support the heavy weight of table tops.

The table base spiders are durable and long-lasting, made of versatile stamped steel. They are exceptionally easy to install and are an important addition to large or heavy table tops, allowing for stabilization. Used in conjunction with the spiders, this kit's base plates can easily be installed. Plus, they come with a black, powder-coated finish that promotes a professional appearance and matches any color table top. Made of durable cast iron, these base plates are sure to provide long-lasting use. They include pre-drilled holes, making it easy to insert glides to prevent your floors from being scratched.

Additionally, there are 2 hardware packs that each come with 2 floor glides and 8 screws, allowing you to easily add glides to the bottom of the table bases to level them and keep them from rocking or shaking. Each glide features a durable, rubber pad for long-lasting use. Not only do they ensure quiet maneuverability while you rearrange tables to accommodate large groups of guests, they also make tables simple to move for floor cleaning at the end of the night or a busy shift. When used together, this Lancaster Table & Seating hardware table top and base kit will upgrade the tables in your dining room!

### Kit Includes:

- (1) table top
- (2) table base column
- (2) table base spider
- (2) table base plate
