Notes & Details

Add a unique, rustic ambiance to your pub, cafe, or restaurant with this Lancaster Table & Seating 36" square standard height wood butcher block table with espresso finish and cast iron cross base plate. Coming with an attractive table top and compatible standard height base, this set provides you with everything you need to set up and complete the look of your dining area. From the strong, sturdy cast iron base plate and spider, to the sleek black column and durable wood top, this table is an all-in-one addition to any establishment.

This table's butcher block style top highlights the natural beauty of the array of different wood species. Beech, birch, pine, ash, and oak are all found in this table top which complement, as well as contrast, with one another through natural grain pattern variance and shade. With a dark and rich espresso stain, each strip of wood accepts the stain differently, giving a uniform appearance while simultaneously allowing each unique species to stand out. Made from farmed wood, this table top provides your establishment with a distinct aesthetic that can't be duplicated.

Composed of 3/4" solid strips, the wood is affixed to 1/2" plywood for increased structural durability and stability. A 2" thick solid wood border surrounds the perimeter of the table, giving the appearance of a thicker table while maintaining a lightweight composition. It is specially designed to provide you with a dining option that will look fantastic and deliver long-lasting performance at an unbeatable price.

This table's eye-catching table top is accented and supported by the included table base. A 25" high black powder-coated steel column and rod extends the table top to standard height and is connected to the table top via a black, powder-coated 10" spider attachment. At the base of the table, a 30" x 30" black, powder-coated base plate helps to prevent the table from wobbling, ensuring stability and balance. A 12-piece floor glide and screw hardware kit attaches to the base, further assisting in leveling the table while preventing the base from scratching the floor. Whether you're using it in a restaurant, pub, or cafe, if you're looking for a table top that spotlights the beauty of nature while also focusing on an elegant dining experience, this table is the best of both worlds!

This table comes unassembled to save you on shipping costs.
