Post Diameter	3 Inches
Assembled	Assembly Required
Base Style	Round
Color	Black
Finish	Powder-Coated

## Technical Data

Material	Steel
Type	Table Bases
Usage	Indoor

## Notes & Details

Ideal for a wide array of environments, the Lancaster Table & Seating stamped steel 22" round black 3" standard height column table base is a sturdy, reliable, and attractive choice for your establishment. Made with durable, stamped steel, this easy-to-assemble base kit comes with everything you need, excluding the tabletop. The round base offers a stable support for the central column, which will combat any rocking or wobbliness. The standard height column is great for adding additional dining room tables in your restaurant, cafe, or bar. Its black powder coat finish also gives this base that classic, sleek appearance.

The 3" column diameter is more of an aesthetic choice that still has a similar load rating compared to slightly larger variations; therefore, you can choose from a wide selection of tabletops, which includes some of those heavier options. Within the base column lies a threaded interior column that easily fastens to the spider plate - a pre-drilled, cast-iron plate intended to secure the column to the tabletop. Conveniently, all hardware is included, so there is no additional purchases of screws or small parts for installation. Wherever this attractive base is placed, and whatever top it supports, it's sure to stand steady and strong for years to come!

### Overall Dimension:

Base Diameter: 22"

Height: 28"

Column Diameter: 3"
