Finish	Powder-Coated

Technical Data

Features	Protective Finish Self-Leveling
Material	Steel
Type	Table Bases
Usage	Indoor

Notes & Details

Ideal for a wide array of environments, the Lancaster Table & Seating stamped steel 22" x 22" black 4" bar height column table base with leveling table feet is a sturdy, reliable, and attractive choice for your establishment. Made with durable, stamped steel, this easy-to-assemble base kit comes with everything you need, excluding the tabletop. The cross base offers a stable support for the central column, which will combat any rocking or wobbliness. The bar height column is not only great for casual seating, when paired with bar height chairs (sold separately), but also makes for a great standing room only lounge option for entertaining. Its black powder coat finish also gives this base that classic, sleek appearance.

The 4 1/4" to 4 3/8" column diameter is more of an aesthetic choice that still has a similar load rating compared to slightly larger variations; therefore, you can choose from a wide selection of tabletops, which includes some of those heavier options. Within the base column lies a threaded interior column that easily fastens to the spider plate - a pre-drilled, cast-iron plate intended to secure the column to the tabletop. Conveniently, all hardware is included, so there are no additional purchases of screws or small parts for installation. Plus, this kit includes leveling table feet to ensure the table is nice and steady. Each foot will independently adjust up to 1/4" to account for uneven floors. They feature a 1/4"-20 thread, allowing them to be installed on most table bases with existing screw-in feet. These levelers can also be installed onto wooden table legs with the included threaded nylon sockets. Wherever this attractive base and level kit are placed, and whatever top they support, they are sure to stand steady and strong for years to come!

Kit Includes:

- (1) base
- (1) pack of leveling table feet
