Notes & Details

Keep your outdoor tables stable with this Lancaster Table & Seating Excalibur table base and column! This cross column base can easily be installed with select Lancaster Table & Seating Excalibur table tops (sold separately) to elevate them to standard dining height and to ensure tables stay steady and balanced while guests enjoy your signature drinks and dishes. Made of strong stamped steel with a sleek and resilient black e-coating, it's well equipped to weather the elements and resist corrosion.

Blending into any environment to enhance your dining space, this table base and column kit is sure to provide reliable long-lasting use at both indoor and outdoor eateries. Plus, pre-drilled holes allow for the use of floor glides to protect your flooring from scuffs and scratches! Use this table base and its included hardware to replace a worn or damaged base on your Lancaster Table & Seating Excalibur table (sold separately).

This table base also comes with an innovative 4-pack of FLAT Tech Equalizer 1/4"-20 thread black table levelers. These levelers adjust up to 1/4" in height and lock in place to stabilize the base, ensuring an ideal, professional dining experience in your establishment. They can also be used to align tables together by simply tilting or lifting a table top in the direction of an adjoining top. Then, to level your table, simply push down on the table top to stabilize. The feet will adjust to create a perfectly aligned surface, making it great for large parties that require multiple tables to be pushed together.

The Equalizer levelers are made of reinforced plastic that houses a 1/4"-20 stainless steel thread. The thread compresses into the foot and automatically activates the hydraulic stabilization technology within. It's sure to help prevent customer complaints and accidental spills that may be caused by uneven table surfaces. Additionally, it is impact- and corrosion-resistant, guaranteeing use for years to come. Exceeding international standards for stability, strength, durability, and safety, these table levelers create a more enjoyable dining area for your guests.
