## Notes & Details

For a safe, durable storage solution, rely on this Lavex Pro shelving unit! This unit comes with (4) 24" x 72" x 3/8" heavy-duty particleboard shelves and (4) 72" heavy-duty 1-piece uprights, which provide a strong, reliable framework to safely store and access industrial materials. It includes heavy-duty double rivet beam support for rigid assembly and exceptional strength. The uprights are made of powder-coated 18 gauge steel while the beams are constructed of powder-coated 16 gauge steel for added durability. Each shelf has an impressive 1,200 lb. load capacity, so you can confidently store heavy or oversized items. Since the shelves are solid, they allow for efficient loading and unloading and can easily accommodate items that might fall through regular vented or wire shelving.

This unit is easy to assemble thanks to its boltless design, which allows you to install it with just the use of a rubber mallet. This design also makes it easy to access from all sides, so you won't be limited in where you can place it. Designed to meet the needs of industrial settings, it's a dependable addition to any stockroom or warehouse. Use this boltless shelving unit to keep your facility neatly organized!

### Kit Includes:

- (4) 72" uprights
- (4) 24" x 72" particleboard shelves
