Notes & Details

Dispense water with efficiency and style using this Narvon 8 GPH countertop water dispenser with chilled, ambient, sparkling, and hot water options. This water dispenser boasts a durable stainless steel construction with a sleek black finish. Its tall dispensing area accepts most large water bottles. This unit is able to dispense hot, ambient, chilled, and sparkling water with a CO2 cylinder (sold separately), making it extremely versatile. It allows you to adjust your water temperatures, serving cold water from 41-53.6 degrees Fahrenheit, ambient water from 60.8-89.6 degrees Fahrenheit, and hot water up to 179.6 degrees Fahrenheit. It dispenses 8 gallons of chilled water per hour, while its hot water tank holds up to 1 liter of water.

With convenient push connect fittings, this unit is easy to install. It is great for small- to medium-sized offices and restaurants, and it has a stylish design that fits into any space. It features easy-to-use LED buttons. To prevent your unit from overheating, this dispenser includes a forced ventilation grill. It also provides safety warning on the status of the boiler. Plus, its integrated drip tray catches any spills to help keep your space clean and dry. This dispenser uses R-290 refrigerant and it requires a 120V electrical connection for use. Effortlessly serve a variety of water options to staff and guests with this Narvon water dispenser!
