Notes & Details

Efficiently dispense water using this Narvon 20 GPH undercounter water dispenser with chilled, ambient, and sparkling water options. This water dispenser boasts a durable stainless steel construction, while its undercounter design fits conveniently under your counter to save valuable counter space. It's compatible with any countertop taps, making it a convenient solution for busy restaurants, airports, or offices. This unit dispenses 20 gallons of chilled water per hour and it is also able to dispense ambient and sparkling water with a CO2 cylinder (sold separately). It allows you to adjust your water temperatures, serving cold water from 41-53.6 degrees Fahrenheit and ambient water from 60.8-89.6 degrees Fahrenheit.

This dispenser is equipped with a 3.7 gallon ice bank for quick access to ice. With convenient push connect fittings, it is easy to install. To prevent your unit from overheating, this dispenser includes a conveyor that pushes warm air out through a single opening, ensuring optimal heat dissipation. This dispenser uses R-290 refrigerant and it requires a 120V electrical connection for use. Effortlessly serve a variety of water options to staff and guests with this Narvon water dispenser!
