Notes & Details

Quench your guests' thirsts and elevate the beverage service with the Narvon D5G-4 quadruple 5 gallon bowl refrigerated beverage dispenser! Great for iced tea, lemonade, juice, or other cold drinks, this dispenser is sure to boost beverage sales by showing off the refreshing drink inside, increasing your customers' thirst.

The (4) large 5 gallon bowls are virtually unbreakable and give high visibility to the contents inside. It is simple to remove for cleaning and sanitation at the end of each day. Gallon markings on the bowl let you monitor how much liquid is being dispensed. The paddle system keeps beverages properly mixed without separating and does so without causing froth or oxidation, which otherwise compromise taste and quality. Temperature is adjustable through intuitive independent bowl controls so that you can make sure your guests are enjoying their drinks at the ideal temperature.

A stainless steel, dripless pouring valve will prevent post-pour drips from making a mess and wasting product. The drip tray is removable so it can be easily emptied and cleaned as necessary. For long lasting operation, tight seal gaskets prevent any moisture or outside contaminants from entering the compressor housing. Durably constructed, the body of this dispenser as well as the evaporator are made of stainless steel. For protection, ABS plastic side panels wrap around the body to deter damage to the steel casing.
