Type	Granita / Slushy Machines

Notes & Details

Quench your guests' thirsts at your bar, convenience store, or family-owned restaurant by utilizing this Narvon Summit triple 3.2 gallon granita / slushy / frozen beverage dispenser! Great for frozen favorites like slushies, granitas, and even alcoholic beverages, this versatile dispenser is sure to maximize the beverage sales at any establishment by showing off the lucrative specialties you have to offer!

The (3) 3.2 gallon bowls promote excellent product visibility to boost impulse sales at your business and the temperature of each bowl is easily monitored thanks to the unit's automatic mode. This feature accommodates your busy schedule, as it automatically switches the machine into "standby" mode overnight and will refreeze the ingredients just before your business opens for the day. This means that you can ensure your guests are enjoying their purchases at an ideal consistency. Plus, the machine's specialized cooling system reduces prep times, so you can spend less time on preparation and more time entertaining guests.

For ultimate versatility, this beverage dispenser fits perfectly on any countertop. Because it's designed with vertical air flow, it doesn't require any clearance space, so it can be installed next to other equipment without hesitation. This machine is also built with convenience in mind. When it's time to craft your frozen beverages, the liquid mixture can be poured directly into the bowls without removing the lids. After service is finished, the unit's quick defrost kicks into action by defrosting the frozen mix 75% faster than competitors' beverage dispensers. Not to mention, the bowls and their components can be easily removed without the need for tools, so there's less to clean and less hassle at the end of the day. This beverage dispenser requires a 115V electrical connection for operation.
