Notes & Details

Quench your guests' thirsts and elevate the beverage service at your concession stand, buffet, or cafeteria with the Narvon double 5 gallon bowl refrigerated beverage dispenser! Great for use with a variety of cold beverages such as fruit juices, iced tea, lemonade, and other cold drinks, this dispenser is sure to boost beverage sales by showing off the refreshing drink inside, increasing your customers' thirst. Each large, clear 5 gallon bowl is made from shockproof, food-grade polycarbonate that is virtually unbreakable and gives high visibility to the contents inside while the durable stainless steel unibody protects the machine components and offers a modern look.

Drinks inside the unit are stirred with a magnetic transmission system that ensures the contents are properly mixed. With the dispenser's smart cooling system paired with fast cooling technology, this user-friendly dispenser can comfortably serve (40) 16 oz. portions per bowl. Despite having 2 separate bowls, this unit also features a compact footprint that can fit on most countertops, saving you valuable counter space. This unit's large durable drip tray prevents drips, splashes, and spills from creating a messy countertop, allowing you to keep your beverage area looking clean and presentable. Plus, each bowl features a maximum fill line to help ensure that a proper amount of liquid is always present in the machine.

This beverage dispenser is simple to dismantle quickly for cleaning and sanitation at the end of each day. An easy-to-use switch controls the power, refrigeration, and bowl circulation for the unit. This offers incredible simplicity to help keep your operation running smoothly. Once the switch is flipped on, the dispenser's refrigeration system uses an eco-friendly R290 refrigerant to cool the bowl, providing continuously refreshing drinks. This cold beverage dispenser requires a 115V electrical connection.
