NEST POUR OVER KIT

ABOUT

The Nest Pour Over Kit incorporates double walled insulated recycled stainless-steel materials with a BPA free food grade polypropylene lid and storage connector into a portable pour over coffee brewing system.

Featuring VSSL's unique design DNA, dual-threading allows the 5-piece kit to assemble into one compact, transportable unit. When disassembled, the Nest Pour Over Kit has a 10 oz mug, one lid, a second dual purpose 10 oz mug for your freshly brewed coffee or bean storage, an insulated pour over device, and a storage connector to house the VSSL Java G25 Grinder (sold separately). External indent grip lines also bring visual cues for turning.

Through an integrated system, the Nest Pour Over Kit system enhances your coffee drinking experience for any adventures ahead.
