

Superior suction power for high-frequency cleaning and large container volume

ATTIX 50 combines high Wet&Dry performance with big container capacity - the ideal solution for demanding customers with high frequency cleaning. The improved ergonomic design ensures functional and user-friendly operation - all in all an efficient and reliable solution.

ATTIX 50 will solve all major tasks in your company, workshop, garage, production etc. The Push&Clean or XtremeClean offers an impressive cleaning performance and keeps the suction performance constantly high. The design offers you cable storage, accessory storage and a big tool deposit to keep all you need at hand. The larger size of the ATTIX 50 allows you to work longer without emptying the container, and with the wide range of available models, it's difficult to imagine that you won't find a perfect match for your wetand dry vacuum cleaning tasks.

Operating costs are minimized with the washable PET fleece filter elements, and the low working noise level lets you work when others are nearby, without disturbing them.

The -21 models are equipped with a convenience socket so no need for a extra extension cable, just plug your tool into the vacuum cleaner.

Automatic On/Off (-21) models are the choice of people who use the vacuum cleaner with electric hand tools because starting or stopping the tool starts and stops the vacuum, as well. An optional Airbox is available which performs with the same function when using pneumatic tools.

Picture shown may not represent model quoted

- Low working sound level - SilentPower - high performance that is seen, but not heard
- MultiFit accessory system for the ultimate in task flexibility
- Washable PET fleece filter with minimum 99.9% filtration efficiency
- Accessory storage and tool deposit
- AntiStatic System
