Water Temperature	120 - 140 Degrees F
Water Usage	1.2 Gallons Per Rack

Notes & Details

Quickly, easily, and efficiently clean full racks of used dishes with the Noble Warewashing low temperature undercounter dish machine and its compatible 10" adjustable stand. The power of this dishwasher combines with the convenience of a stand that elevates the machine and reduces strain to create an ideal asset for your busy foodservice establishment. The durable stainless steel stand has a height of 9 7/16" with adjustable feet that can raise it to 10 7/16". Keeping your dishes and glasses clean is essential to the life of your business, and thanks to this durable unit, you can successfully clean up to 24 racks per hour with 1.2 gallons of water per rack! This ensures that you'll always be able to keep up with peak hours of service at your establishment.

For maximum cleaning power, the unit comes with a convenient deliming cycle to make quick work of removing hard water deposits. As a result, dishes are left sparkling clean with every wash. Thanks to its compact, undercounter design, the unit is perfect for kitchens with limited space available and a need for efficient warewashing. Made with rugged stainless steel, this machine is built to withstand heavy-duty use in a commercial kitchen.

Operation of the machine begins when you press the easy-to-use push button. The unit fills, thanks to the automatic fill feature, and the cycle starts. During the cycle, you can easily track its progress with the universal timer. To accommodate a variety of drain installations, the drain automatically pumps while the unit runs with the powerful, 1 hp wash pump.

This low temperature warewashing machine comes with built-in chemical pumps and priming switches. It also features a low product indicator light, which illuminates when the detergent and sanitizer are low. This serves to alert the operator that the chemicals need refilled for continued warewashing service. This unit requires a 115V electrical connection for operation.
