

Non-Stick

Dual Handle Fry Pans

Combining durability and efficiency

Not only are these fry pans a top-performing cooking vessel, but they can be used for serving or displaying, creating a memorable experience for your guests - perfect for cooking omelets at brunch or family style dining.

Special Features

Durable Stainless Steel Construction

Constructed of durable, scratch-resistant stainless steel, these fry pans make the perfect workhorses for any commercial kitchen, withstanding the rigors of everyday use.

Superior Heat Distribution

Features a 4mm thick aluminum clad bottom, increasing heat distribution to deliver consistent mouthwatering creations and eliminate hot spots.

Flavor Neutrality

Smooth nonreactive stainless steel interior promotes flavor neutrality by not interfering with the chemical composition of your signature dishes.

Handle Design

Riveted handle ensures longevity and a secure connection. An added helper handle for larger sizes helps to easily maneuver and transport.

Non-Stick Excalibur Coating

Reinforced with a stainless-steel alloy for long-lasting durability, Excalibur has exceptional non-stick release properties to limit the use of oils and fats, promoting healthier meals and ensuring easy cleanup.

Induction Ready

Can be used on standard gas or electric cooktops as well as induction surfaces for foodservice establishments transitioning to induction to increase operational efficiencies to save on cost.
