

**Powr-Flite®**

**POWERFUL  
AND DURABLE!**

A superior solution  
for structural drying!

Item# PDF5

## F5 Axial Fan Airmover/Dryer

Item# PDF5 - PDF5DX

**One of the most effective solutions for structural drying after floods or leaks!**

- Incredibly low 2.2 amp draw
- Multiple position versatility, 2 speeds
- Dry structures fast with more than 3000 CFM
- Daisy-chain up to 5 together with built-in GFCI outlet
- Stack up to 5 for easy storage or transporting
- Heavy-duty, roto-molded housing provides uncompromised durability
- 1 year warranty

PDF5DX model comes complete with handle and wheels for added maneuverability.

**POWERFUL & FAST DRYING**

The F5 Axial Fan is one of the most effective solutions for structural drying after floods or leaks. This fan combines flexible positioning with high volume, high velocity airflow for fast drying times. Use the F5 to dry carpets and padding, rugs, dry wall, paint and much more.

Use up to 6 units on a single 15 amp circuit. Built in GFCI outlets allows you to daisy-chain up to 5 units.

Reduce drying time by 50% or more with Powr-Pitch™! Perfect for flood restoration jobs!

Stackable up to 6 high. Built in cord wrap. Optional caster kit also available

Multiple positions for every drying need
