

Regency 36" Mobile Gas Connector Hose - 1/2"

#600GHM1236

Technical Data

Length	36 Inches
Diameter	1/2 Inch
Maximum PSI	0.5 PSI
Temperature Rating	-40 - 150 Degrees F
Type	Mobile Gas Hoses
Usage	Indoor

Features

- 36" long hose; 1/2" diameter
- For use with mobile equipment that will be regularly moved for cleaning and maintenance
- Flexible stainless steel corrugated tube with stainless steel braid for stretch prevention
- Yellow PVC coating prevents grease buildup; fittings allow 360 degree rotation at both ends

Certifications

Notes & Details

Keep your gas equipment working safely and efficiently with this 36" mobile gas hose from Regency. Having a good quality gas hose, and the right hose for your application can mean the difference between a kitchen that keeps up with orders and a major safety hazard, so it's important to replace a damaged hose immediately and to also consider how you will be using your equipment before choosing a new hose.

This gas hose is 36" long with a 1/2" diameter, and is intended for applications where the equipment is mounted on casters and will be moved on a regular basis for cleaning and maintenance. To aid with mobility this hose features a 360 degree rotational fitting design that prevents the hose from twisting or kinking. It is made from stainless steel corrugated tubing to provide strength and flexibility, while a stainless steel braid keeps the hose from stretching. A PVC coating seals the hose and helps to keep grease and dirt from accumulating on it.
