Type	Stationary Gas Hose Kits
Usage	Indoor

Features

- 36" long hose; 1/2" diameter
- For use with stationary equipment
- Flexible stainless steel corrugated tube
- Black PVC coating prevents grease buildup
- Includes 2 elbows and full port valve

Certifications

Notes & Details

Keep your gas equipment working safely and efficiently with this 36" stationary gas hose kit from Regency. Having a good quality gas hose, and the right hose for your application can mean the difference between a kitchen that keeps up with orders and a major safety hazard, so it's important to replace a damaged hose immediately and to also consider how you will be using your equipment before choosing a new hose.

This gas hose is 36" long with a 1/2" diameter, and is intended for applications where the equipment is curb-mounted or mounted on stationary legs and will not be moved on a regular basis for cleaning and maintenance. It is made from stainless steel corrugated tubing to provide strength and flexibility, and a PVC coating seals the hose and helps to keep grease and dirt from accumulating on it. It also comes with (2) elbows and a full port valve for easy installation.

Kit Includes:

- (1) 36" stationary gas hose, 1/2" diameter
- (2) elbows
- (1) full port valve
