Type	Keg Dollies / Trucks Pail Trucks
Wheel Type	Roller Bearing

Notes & Details

This Regency KPT-400 keg and pail truck allows you to lift, move, and place heavy kegs and pails with ease! Its Zero Lift design makes transportation simple. Just roll up, hook up your keg, and walk away. No lifting is required. You can effortlessly transport barrels of beer and stockpots around tight corners, up stairs, over thresholds and into drawer boxes effortlessly.

The ergonomically designed, epoxy-coated handle gives you superior grip and control to maneuver your heavy items, effectively reducing the risk of injury that can result from manual heavy lifting.

Constructed of fully welded, durable painted steel with a 400 lb. weight capacity, the truck comes complete with permanently oiled 8" roller bearing wheels for smooth, easy rolling. Transporting heavy beer kegs is easy with the sturdy, convenient keg hook and angled support bar that provides cradling support to limit any shifting. Additionally, a hanging hook at the top of the truck handle allows you to store it in space-saving locations while not in use.
