- 2" NPT drain outlet
- Fits a 3 1/2" sink opening
- Overflow pipe prevents sink water from spilling over
- ScrapLock strainer with triple lock design protects sinks from clogs and blockages
- Comfortable, easy-to-use twist handle

Notes & Details

This twist handle waste valve features a 2" drain outlet that's perfect for any commercial pot sink with a 3 1/2" opening. Easy to install, this waste valve employs its simple design to ensure a tight seal and prevent leaking. Unlike traditional drains that require your staff to reach into dirty wash water for emptying, this unit features a long handle underneath the sink bowl for hassle-free, safe water removal. The rubber end provides comfort and grip during use, while the included overflow pipe helps prevent sink water from spilling over when the drain is clogged or the faucets are accidentally left on.

This twist handle waste valve from Regency is sure to streamline your warewashing and janitorial tasks, and your staff will love its convenient, easy-to-use design. The included strainer drain top prevents larger waste particles from entering your drain in order to keep your pipes flowing smoothly, and it's removable for easy cleaning as needed.

As an additional straining option, the included Regency ScrapLock 3 1/2" locking drain strainer is the perfect piece of equipment to keep food and debris from blocking your drain. Equipped with everything necessary for an easy installation, this item fits into most 3 1/2" commercial sink drains with waste valves. With a unique triple lock design and a tamper-proof guard, you can prevent drain back ups and grease trap maintenance issues for the long term.
