| Water Inlet Size     | 1/2 Inches               |

## Notes & Details

This stainless steel Regency dipper well bowl has a 5 5/8" opening to easily hold flatware, ice cream scoops, and more without obstructing water flow! A dipper well is an essential part of an ice cream shop or snack bar. Keeping your dipper well in good condition is important in order to keep it working like it should.

The inner bowl, 1 1/2" drain size, and 4 1/4" long brass pipe allow this unit to handle overflow and drainage with ease. Since it is made to sit in an existing counter, only the rim will show for a sleek and professional look. When you are ready to install this dipper well bowl, it requires a 6" cutout in the counter.

Included with this unit is a convenient and useful dipper well faucet! This faucet features a stainless steel finish for a sleek appearance and long-lasting durability. Thanks to its 1/2" NPSM and 1/4" NPT brass tailpiece, this faucet can quickly install into your existing water lines.
