Notes & Details

This Regency deck-mounted faucet is the perfect solution when you need a dependable water fixture in your facility! Regency faucets provide the industry-leading quality you expect. With a chrome-plated brass faucet body and ceramic cartridges engineered for durability, you can install this model with confidence. This faucet features an 8" long swing spout that moves easily around the sink bowl, while a 2 GPM aerator provides a consistent flow rate and minimal splashing. It boasts a set of 4" adjustable centers, while the deck-mounted design is easy to install with 1/2" male NPS inlets.

This faucet uses ceramic cartridges, which provide a much lower fail rate than the compression cartridges widely used in the industry. In this design, 2 ceramic discs fit together to create a watertight seal when closed. This removes the need for a rubber seat washer, which is one of the most frequently replaced parts on a faucet. The sturdy lever handle design makes it easy to turn the water flow off and on.
